

The JOKER of Keio Corporation

On Halloween in 2021, there is a horror attack happened in Japan. The bad guy wearing purple shirt and purple coat. As same as JOKER in "The Batman." He hurt 8 people cruelly with a sharp knife on the MRT. After that, the criminal also spread the oil and set fire on the chairs. Everyone in that MRT was screaming and shouting panicked at that moment. People ran out of the car with their hearts filled with fear.

In the end of his terrible behaviors, he just sat on the chair, smoked, and relaxed with a creepy and cold smile, waiting for the police to catch him and make him die. The death is always what the man want. According to what he said, he hated to see the women with happiness, so a girl study in university was set up to be his first victim.

That's what the problem is, too many people weren't cared by another people. What they can do was just falling into the wrong way, and ask for death. What was this event want to tell us actually is that everyone should take more care of each other, and care about our mental health on the same time.
