

Illustration and Writing Contest- Now and Future: 2020 vs. 2030

In 2020, I think the buildings make the city colorful, and there a lot of signs and boards on the buildings.

Our transportation method includes car, motorcycle,train,bus,plane and our legs, we also walk by ourselves.

In 2030,I think everything will be simple 、united and neat ,like city and its buildings. I think the technology will be improved, and I believe machine will replace the Foodpanda and Uber-eat.The food will be transported by machine.

There will be no people on the road because people are lazy.They don't want to do anything, so they would have invited a machine flying on the sky whose function is just like car and motorcycle , but is faster, more convenient, and it can save time, too.
