

Illustration and Writing Contest- Now and Then

The photo in the past called Polaroid picture. Polaroid used a specialized film to take pictures. Quality of Polaroid pictures were usually not well, and it seemed yellow discolouration. The color looked dim, subdued and faded.

But now, with the ever-changing nature of technology, the pictures now are more beautiful and clear. The color of the pictures are bright and vivid than old photos.

The tools change a lot, too. Everyone has a smart phone in this era, then taking a picture is easier. Some pictures taken by mobile phone are just as good as the camera takes.
