

Illustration and Writing Contest- Now and Then

This picture means the difference between the old street and the modern one. The street on the left looks like an old shop in the ancient times. There are ancient flavored bean curd and ice shop.

The 7-11 right next to the grocery store is the convenience store in the street. It is very convenient for us. For example, withdrawals, remittances and deposits can be executed immediately. There's no need to run to the bank like before. The building is also different, It seems very simple, now it looks very technological and luxurious.

This picture represents the evolution of the times and the continuous progress of science and technology.
